MEDICAL MICRONEEDLING TREATMENT PROTOCOL

amiea med

ATROPHIC / ACNE / POST-SURGICAL SCARS

TARGET

Rolling, boxcar and ice-pick atrophic scars (not hypertrophic or keloid).

TREATMENT PARAMETERS

RECOMMENDED NEEDLE DEPTH

1.5 - 1.9 mm

Deeper penetration is needed for dermal remodeling.

Use 1.9 mm only for deeper rolling scars on cheeks or body.

NUMBER OF SESSIONS

4 - 8

Severe scars may require 6 - 8 sessions.

FREQUENCY

EVERY 4 - 6 WEEKS

Longer interval for deeper treatments to allow collagen maturation.

MAX 1.9 MM — Only for deeper rolling scars on cheeks or body.

CLINICAL GUIDANCE

SCAR TYPES

Rolling, boxcar and ice-pick atrophic scars. Not hypertrophic or keloid scars.

ENHANCEMENTS

Strongly recommended: combine with PRP or growth-factor serum for faster scar filling.

EXPECTED RESULTS

50-70% improvement in scar depth and texture after a full course; best results in atrophic scars.

TREATMENT DEPTH MAP

Indicative facial scar zoning
