MEDICAL MICRONEEDLING TREATMENT PROTOCOL

amiea med

STRIAE / STRETCH MARKS

TARGET

White (mature) or red (recent) striae on the abdomen, thighs, buttocks, breasts and arms.

TREATMENT PARAMETERS

RECOMMENDED NEEDLE DEPTH

1.5 - 1.9 mm

Body skin is thicker. Target the mid-dermis to stimulate collagen and elastin.

NUMBER OF SESSIONS

3 - 8

Most patients need 4 - 6; newer red striae respond faster.

FREQUENCY

4 - 6 WEEKS

BODY 1.5 - 1.9 MM Full collagen remodeling takes 3 - 6 months; older white striae generally require more sessions.

CLINICAL GUIDANCE

TECHNIQUE TIPS

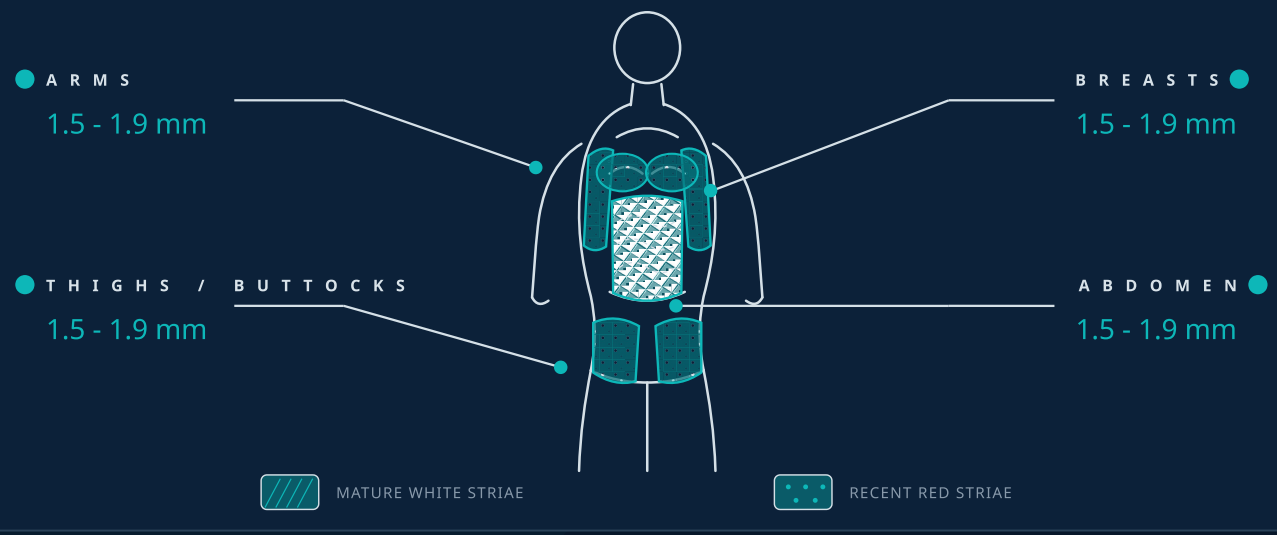
Target the mid-dermis. Newer red striae generally respond faster than older white striae.

ENHANCEMENTS

Apply hyaluronic acid, centella or enzymatic preparations post-needling. PRP is optional for severe cases.

EXPECTED RESULTS

Smoother texture, a narrower appearance and better color match; full remodeling takes 3 - 6 months.

TREATMENT DEPTH MAP


Indicative body zoning
